- The methods used in the study should be explained in detail to allow the work to be reproduced. Reference should be cited if the method had been published.
- Specification of the instruments and equipments (except for glass wares) should also be mentioned clearly.

Results and Discussion

- The title of tables and figures should be numbered consecutively according to their appearance in the text.
- The discussion of the results should be supported by relevant references.
- Decimals numbers adjusted to the type of analysis.
- The data presented figures and tables must Standard Deviation (SD) or Standard Error of Mean (SEM).
- A brief explanation on methods for sampling replication and statistical analysis is required in the methods section.

Conclusion

Conclusion is drawn based on the result, discussion, and the objectives of the research.

Acknowledgement (if necessary)

Acknowledgement contains the institution name of funding body/grants/sponsors or institution which provides facilities for the research project, or persons who assisted in technical work and manuscript preparation

References

- References are arranged in alphabetical.
- Title of book is written with a capital letter for each initial word, except for conjunctions and forewords, while title of journal is only written in capital letter for the initial letter of the first word.
